

1. (Amended) A submicron lipid emulsion pharmaceutical composition comprising:

(a) a therapeutically effective amount of the compound of formula I

(b) an oil component selected from the group consisting of mono-, di-, tri-glyceride or a mixture thereof wherein the monoglyceride and diglyceride are mono- and di- unsaturated fatty acid esters of glycerol having sixteen to twenty-two carbon atom chain length, wherein triglyceride is a saturated fatty acid ester of glycerol having six to twelve carbon atom chain length,

(c) an emulsifying agent consisting of lecithin, and

(d) a liquid phase comprising one or more pharmaceutically acceptable solvents.

A3 21. (Amended) A composition according to Claim 1 that is an oral or parenteral composition.

Please add new Claims 22-23 as follows:

A4
Sub B2

22. ^(NEW) A submicron lipid emulsion pharmaceutical composition selected from the group consisting of a composition comprising:

A⁴ cont.

Component	Weight (mg)
Compound of Formula 1 as defined in Claim 1	60
Triglyceride	200
Propylene Glycol	100
Lecithin	20
Na Deoxycholate	0.5
Glycerine	24
Methyl paraben	1.8
Propyl paraben	0.2
Water	q.s.

And a composition comprising:

Component	Weight (mg)
Compound of Formula 1 as defined in Claim 1	60
GDO/GMO (8:2)	200
Propylene Glycol	100
Lecithin	20
Na Deoxycholate	0.5
Glycerine	2.4
Methyl paraben	1.8
Propyl paraben	0.2
Water	q.s.

23. ^(New) A submicron liquid emulsion pharmaceutical composition selected from the group consisting of a composition comprising:
